### OVERVIEW

Smart Suite Millennium Edition 9.8 is the latest edition of the award-winning office suite including: Lotus 1-2-3, Lotus Word Pro, Lotus Freelance Graphics, Lotus Approach, Lotus Organizer, Lotus Fast Site, and Lotus Smart Center.

LSS (Lotus Smart Suite)

Lotus Approach Millennium Edition

### AT A GLANCE

Lotus Approach Millennium edition is designed for professionals who need to manage, analyze, and report on business information. It occupies a unique position in the database market, offering breakthrough ease of use, unprecedented cross-product integration, connectivity, and outstanding power and analysis capabilities. Sophisticated Team Computing features maximize the sharing of information within the organization.

Approach lets users seamlessly connect to all data, whether it is stored in DBASE, DB2, Oracle, Lotus Notes or almost anywhere else. Tight integration with Lotus Notes and DB2 provides users of these databases with specialized, advanced functionality. Built-in Internet/Intra net capabilities let users easily integrate Approach applications with the Web, without needing to learn HTML.

Lotus Smart Suite is a required purchase enabling the execution of WAA-VIMA.

You can buy directly from IBM @ <http://www-306.ibm.com/software/howtobuy/> The price is \$281.00 plus shipping. This includes complete manuals (Box Package) and limited technical support.

**What is OEM?**

OEM is an abbreviation for Original Equipment Manufacturer. OEM software functions the same as Retail software but is designed to come prepackaged with a new computer system or packaged with an application. This is also called Value Added. We at Old Man's Software of WAA are a value added company by packaging our application WAA-VIMA with Lotus Smart Suite.

---

OEM software typically comes as a reduced packaging product meaning that the manual will be smaller and more compact in the packaging versus the retail box version of the same product. OEM products contain all necessary materials for a single installation. This typically consists of the license, CD, and key code / COA. OEM product does not come packaged in a Retail Box.

**Networking**

LSS works great with Windows 2000, Windows XP, Windows NT V4.0, Windows 98, Windows Me Millennium Edition and Novell. I prefer Peer to Peer under Windows 98 or Windows XP. Its fast and easy to maintain at a low cost.
